**RONDO®**

# EXANGLE® PLASTERING BEADS

The Rondo EXANGLE® range of plastering beads are manufactured to assist contractors in obtaining a strong, straight, knock-resistant corner with a superior finish that lasts. Available for a variety of applications including internal and external corners, shadowlines, archways, control joints, bullnose corners and edge capping.

The lower profile nib on our P01 External Corner Bead reduces the amount of compound build up on the corner, and our shadowline beads can create the impression of greater ceiling heights whilst helping to hide imperfections in the abutting walls.

## PERFORATED OR EXPANDED PROFILES / GALVABOND OR ZINCANEAL STEEL / SIMPLE INTEGRATION

### BENEFITS

- Choice of perforated or Expanded profiles.
- Nail holes on selected profiles for easy installation.
- Minimum coating of Z200.
- Made from 0.30-0.50BMT Galvabond or Zincaneal Steel to provide ideal stiffness.

### SUITABLE FOR

- Internal and External Corners (Internal Use)
- Shadowline applications
- Flashing in wet areas
- Archways
- Control Joints
- Edge capping
- Bullnose corners

## MATERIAL SAFETY DATA INFORMATION

### MATERIALS

Products manufactured by Rondo Building Services are produced from coated steel coil material which is classified as a non-hazardous material.

### PRODUCTION PROCESSES

A water-based soluble lubricant is used to assist with the roll forming process. These soluble lubricants are not considered hazardous when used as recommended by the manufacturer.

### HANDLING AND STORAGE

Products are supplied in pack and sub-pack quantities and should be handled in accordance with the recommendations contained in AS 1470 – Health and Safety at Work Principles and Practice.

Where mechanical lifting or moving equipment is required, trained, and licensed operators are to be used.

Metal products should be stored in an environmentally friendly area away from airborne contaminants such as acid and salt sprays.

### SAFETY

It is our recommendation that PPE should be worn when handling metal products (AS 2161 –Occupational Protective Gloves) and that they should be checked regularly for damage.

People with sensitive skin conditions should seek medical advice before prolonged handling of metal products: hands should be washed before eating and for personal hygiene.

Safety glasses (AS/NZS 1336) should be worn when cutting metal sections.

### SITE TRAINING

It is the responsibility of the contractor to ensure their employees are trained in onsite WHS procedures as these can vary from site to site.

### COMBUSTIBILITY

For more information on the steel used by Rondo visit [www.steel.com.au](http://www.steel.com.au) or [click here](#).

## RONDO WARRANTY

Rondo's quality products are backed by our comprehensive warranty.

With minimal exclusions, our warranty provides optimal peace of mind.
