

The Rondo SHAFTWALL is a one-way erected wall system that is suitable for both fire-rated and sound-rated applications. The system is designed to encase lift shafts, stairwells and service ducting in low and high-rise construction areas.

# SIMPLE INTEGRATION / FIRE-RATED & ACOUSTIC DESIGN/ EFFICIENT

#### **BENEFITS**

- Rapid installation with no need to gain access within the shaft.
- The SHAFTWALL System is most appropriate for lift shafts and stairwells as well as service ducts.
- All components are screw and adhesive fixed so there is no need for welding or bolting, saving labour time.
- Rondo SHAFTWALL System are both acoustic and fire rated.

## **SUITABLE FOR**

- Fire-rated applications
- Sound-rated applications
- Lift shafts
- Stairwells
- Service ducting (low & high-rise construction areas)

## **MATERIAL SAFETY DATA INFORMATION**

## **MATERIALS**

Products manufactured by Rondo Building Services are produced from coated steel coil material which is classified as a non–hazardous material.

## **PRODUCTION PROCESSES**

A water–based soluble lubricant is used to assist with the roll forming process. These soluble lubricants are not considered hazardous when used as recommended by the manufacturer.

## **HANDLING AND STORAGE**

Products are supplied in pack and sub–pack quantities and should be handled in accordance with the recommendations contained in AS 1470 – Health and Safety at Work Principles and Practice.

Where mechanical lifting or moving equipment is required, trained, and licensed operators are to be used.

Metal products should be stored in an environmentally friendly area away from airborne contaminants such as acid and salt sprays.

#### **SAFETY**

It is our recommendation that PPE should be worn when handling metal products (AS 2161 –Occupational Protective Gloves) and that they should be checked regularly for damage.

People with sensitive skin conditions should seek medical advice before prolonged handling of metal products: hands should be washed before eating and for personal hygiene.

Safety glasses (AS/NZS 1336) should be worn when cutting metal sections.

## SITE TRAINING

It is the responsibility of the contractor to ensure their employees are trained in onsite WHS procedures as these can vary from site to site.

## **COMBUSTIBILITY**

For more information on the steel used by Rondo visit www.steel.com.au or <u>click here.</u>

PRODUCT DATA SHEET

# **ENVIRONMENTAL PRODUCT DECLARATION** (EPD)

The Rondo EPD provides to a customer the Life Cycle Assessment (LCA) data for over 300 products and 53 product families.

source the LCA data by selecting the required part numbers that make up the system within one EPD.

The Rondo EPD was certified, and made available to Rondo customers in December 2020, **click here** to download.

# **RONDO WARRANTY**

Rondo's quality products are backed by our comprehensive warranty.

With minimal exclusions, our warranty provides optimal peace of mind.

For more information on our warranty **click here**.
