BETAGRIP® CLIPS

Rondo is pleased to announce the introduction of a second generation of clips known as BETAGRIP®. The new BETAGRIP® clip collection improves on the original BETAFIX design with an extended base which includes two additional fixing points for the installer.

The new design provides customers with the option to use a double fixing for more difficult installations, such as uneven surfaces, where a single fixing may be unstable. The extended plate design also allows the BETAGRIP® clip to be attached to the Furring Channel before being secured to the structure if desired.

All existing BETAFIX clips supplied by Rondo will be upgraded to the new BETAGRIP® clips as the BETAFIX stocks are exhausted.

To view the range of profiles in more detail, visit www.rondo.com.au

BETAGRIP® Specifications:

PART NO	DESCRIPTION	WEIGHT (kg)	STOCK PACK	SUB PACK
BG01	Standard clip	0.043	200	200
